Electrical and electronic equipment**

Replacement Gaussmeter Hall Probes

Directive 2011/65/EC allows spare parts for the repair, the reuse, the updating of functionalities or upgrading of capacity of the following:

(e) industrial monitoring and control instruments placed on the market before 22 July 2017

Per paragraph (27), 'spare part' means a separate part of an EEE that can replace a part of an EEE. The EEE cannot function as intended without that part of the EEE. The functionality of EEE is restored or is upgraded when the part is replaced by a spare part;

Gaussmeters fall into the category of industrial monitoring and control instruments.

For Gaussmeters that shipped before 22 July 2017, Hall probes may continue to be provided by Lake Shore Cryotronics as spare parts; they fall into the category of 'spare part' in that the Gaussmeter (EEE) cannot function without the probe. These probes may be replaced to restore the Gaussmeter functionality or to upgrade the Gaussmeter.

On Behalf of Lake Shore:

Scott Ayer
Director of Quality and Compliance
Lake Shore Cryotronics, Inc.
